Jahswill Onuegbu

AI & Full-Stack Software Engineer

+356 9998 9225 | onuegbujahswill@gmail.com | Malta | jahswill.vercel.app

PROFESSIONAL PROFILE

AI and full-stack software engineer with 5+ years of experience progressing from frontend development into end-to-end product, backend, AI, and cloud engineering. Builds responsive interfaces, secure APIs, AI-powered workflows, asynchronous services, and production deployments across SaaS, EdTech, marketplaces, and business systems.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Redux, Tailwind CSS, Lexical, responsive UI, accessibility, component systems
Backend & Data: Python, Node.js, Express, FastAPI, PHP, Laravel, REST APIs, GraphQL, PostgreSQL, MongoDB, Redis, SQLAlchemy
AI & Cloud: LLMs, AI agents, Gemini, Vertex AI, OpenAI, OpenRouter, Docker, Kubernetes, AWS, Azure, GCP
Delivery & Quality: GitHub Actions, CI/CD, Celery, BullMQ, OAuth, JWT, Pytest, unit/integration/E2E testing, logging, monitoring

CORE PROFESSIONAL EXPERIENCE

AurifyAI - EdTech Platform

Jan 2023 - Dec 2025

Lead Frontend Developer | ***Jan 2023 - Dec 2023***

- Led frontend delivery for an AI-powered learning platform, translating product requirements into responsive Next.js and TypeScript experiences.
- Created reusable component patterns and accessible workflows for generated study content, quizzes, guided learning, and audio experiences.
- Collaborated across product and backend work to connect interface states, validation, authentication, and AI-generated learning content.

AI Engineer | ***Jan 2024 - Dec 2025***

- Designed multi-stage AI and agentic pipelines with Gemini and Vertex AI for content generation, workflow orchestration, and scalable inference.
- Built FastAPI services and asynchronous processing with Celery, Redis, JWT authentication, and AWS S3 for secure high-volume workflows.
- Implemented TTS and AI audio generation and added validation, retries, and error handling for reliable multimodal learning experiences.
- Deployed Dockerized microservices with Kubernetes and GitHub Actions CI/CD across cloud environments.

J.J Willmin - Construction & Business Systems

Jan 2021 - Dec 2024

Junior Frontend Developer | ***Jan 2021 - Dec 2021***

- Built responsive React, jQuery, and Styled Components interfaces for construction projects, client records, lead generation, and internal operations.
- Translated business requirements into reusable UI workflows for lead capture, project information, and employee-facing processes.

Full-Stack Engineer | ***Jan 2022 - Dec 2024***

- Developed a custom business application and CRM for projects, clients, employees, lead capture, sales follow-up, and operational reporting.
- Integrated APIs, analytics, automated notifications, visit and event records, and advertising-performance tracking across business workflows.
- Expanded into full-stack ownership of data handling, centralized client and employee processes, system reliability, and production support.

FREELANCE PROJECTS

HackrPost - AI-Powered SaaS Platform

Technical Lead & Senior Full-Stack Engineer (Freelance) | ***Dec 2025 - May 2026***

- Led architecture and engineering delivery across Next.js, TypeScript, Node.js, Express, MongoDB, analytics, and publishing workflows.
- Integrated OpenAI and fine-tuned models; cleaned and validated training data and improved model consistency and relevance.
- Built X API scheduling and AI auto-posting with OAuth, BullMQ, Redis, and multiple worker services.
- Deployed Docker services to Azure and GCP through CI/CD and implemented unit, integration, and end-to-end testing.

PLPFactory - Design Marketplace

Senior Frontend Developer (Freelance) | ***Oct 2022 - Dec 2024***

- Led frontend delivery for a React and Redux marketplace serving 10,000 visitors, with responsive workflows for browsing, buying, selling, and managing design assets.
- Developed reusable component systems and managed application state, forms, loading states, and error recovery across marketplace journeys.
- Added UI tests for critical workflows and supported code review, release validation, and coordination with product and backend teams.

Ceemore Smart Luxury Estates - Real Estate Platform

Software Engineer (Freelance) | ***Jan 2026 - Mar 2026***

- Delivered a custom Next.js, TypeScript, Node.js, and PostgreSQL platform with secure authentication and a role-based staff portal.
- Built workflows for listings, property projects, client records, inquiries, support, follow-ups, analytics, and site administration.
- Managed production deployment to Microsoft Azure through GitHub Actions CI/CD and delivered self-service content tools.

DVSongrl.com - Oil Services Company

Frontend Developer (Freelance) | ***Jul 2026***

- Designed and built a client-specific frontend with Next.js, TypeScript, and Tailwind CSS, translating business requirements into a responsive production UI.
- Handled frontend implementation, responsive quality, deployment preparation, and cloud delivery for the client-facing website.
- Completed the working project in under two weeks, meeting the client's deadline within a one-month engagement.

SELECTED PRODUCT PROJECT

Inkwell - AI Voice Interview Platform

Personal Project | ***2026***

- Built a Next.js, TypeScript, FastAPI, and PostgreSQL platform for secure guest voice interviews, using invitation links and article context to guide one-question-at-a-time conversations.
- Implemented WebRTC voice sessions with OpenAI Realtime and ElevenLabs support, live transcript capture, durable persistence, automatic reconnection, and context-aware resume after interruptions.
- Developed asynchronous APIs for invitations, voice sessions, transcripts, and source-linked AI insights, with validation, workspace authorization, failure isolation, and automated tests.

ADDITIONAL EXPERIENCE

Full-Stack Developer - Gold Dust AI | *2023 (6 months)*

- Built a responsive Next.js/React website and integrated forms, CRM, analytics, and third-party services through REST APIs and webhooks.
- Improved production quality through validation, logging, monitoring, SEO, accessibility, and error handling.

Coding Instructor & Community Mentor - ESINED Group and Coderzwave | *2022 - 2026*

- Delivered coding instruction, guided projects, code reviews, debugging support, assignment feedback, and technical mentoring for learners at varied skill levels.

EDUCATION & CERTIFICATIONS

OTHM Level 4 Diploma in Information Technology (EQF/MQF Level 5) - European College of Innovation (ECI), Malta | Expected Nov 2026
International Diploma in Information Technology (MQF Level 4) - Domain Academy, Malta
Harvard University CS50: Introduction to Computer Science - Ongoing
Certifications: Software Engineer - HackerRank | Frontend Developer (React) - HackerRank | Complete Full-Stack Web Development Bootcamp - Udemy
